

INTERVIEW GUIDE

The following interview questions were originally conducted in another language and have been translated into English for the purpose of this paper.

Section 1. Introduction

1. Which design courses have you taught and are currently teaching?
2. For how many years have you been involved in design education?
3. Can you summarize your approach to design courses in three words?

Section 2. Educational Methods & Challenges

4. What is the significance of courses that teach the fundamentals of visual design?
5. What challenges have you encountered or are you currently encountering while teaching these courses?
6. Through which methods outside of a classroom setting can individuals acquire this specific knowledge and skill set?

Section 3. Students

7. What differences do you observe in a classroom setting between students who have prior design education at any level and those who have none?
8. What specific knowledge and skills should a student possess upon successfully completing a basic design course?
9. How would you describe the profile of a student who struggles to understand or enjoy the course, versus one who grasps the material easily and finds it enjoyable?
10. What is the typical "breaking point" or turning point for a student who experiences difficulties while learning design?
11. In the process of learning design, which one is more influential: talent or practice?
12. What kind of challenges do students face while taking design courses? Do you have a specific example that stands out in your memory?
13. Is there anything you would identify by saying, "If students did/knew ____, they would learn this course much more easily"?

Section 4. AI in Design

14. Do you use Artificial Intelligence (AI) in your courses? Do you permit or encourage your students to use it?
15. How can AI be utilized within design education?
16. How does design knowledge affect the use of AI? How does AI usage differ between someone with a design education and someone without?
17. Can AI be used to teach design to the general public? If so, how?
18. If you were to imagine an application that uses AI tools to help everyday individuals learn design principles, how would it function (e.g., a game, an interactive guide, a visual comparison tool, etc.)?

Section 5. Closure

19. What does the future of design education look like? How will the needs and expectations of the new generation of students evolve?
20. How do you define visual design literacy? Why is it important to acquire it?
21. In what ways does learning design contribute to the daily life of a non-designer?
22. Is it possible to cultivate a design inclination in an individual who does not naturally possess one? If so, how?
